

engineering applied thermodynamics question pdf

Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question. The laws of thermodynamics are explained in terms of microscopic constituents by statistical mechanics.

Computer science is the theory, experimentation, and engineering enabling the use of algorithms to process, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. According to Owen Astrachan, computer science is the study of "automating algorithmic processes that scale".

1.. Introduction Glucoamylases (GAs) (1,4- α -D-glucan glucohydrolase, EC 3.2.1.3) catalyse hydrolysis of α -1,4 and α -1,6 glucosidic linkages to release α -D-glucose from the non-reducing ends of starch and related poly- and oligosaccharides (, ; for reviews see ,). Fungal GA is widely used in the manufacture of glucose and fructose syrups. Although activity (k_{cat}/K_m) towards the α -1,6 ...
