Jihoon Kim - College of Engineering

The Department of Mechanical and Aerospace Engineering of the Case School of Engineering offers programs leading to bachelors, masters, and doctoral degrees.

Department of Mechanical and Aerospace Engineering - Case

Mechanics (Greek $\mu\epsilon\chi\alpha\iota\kappa\eta$) is that area of science concerned with the behaviour of physical bodies when subjected to forces or displacements, and the subsequent effects of the bodies on their environment. The scientific discipline has its origins in Ancient Greece with the writings of Aristotle and Archimedes (see History of classical mechanics and Timeline of classical mechanics).

Mechanics - Wikipedia

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...

Stress (mechanics) - Simple English Wikipedia, the free

Mechanical Engineering. Mechanical engineering is concerned with the design, development, manufacture, and operation of a wide variety of energy conversion and machine systems.

Mechanical and Industrial Engineering < New Jersey

Strength of materials, also called mechanics of materials, is a subject which deals with the behavior of solid objects subject to stresses and strains. The complete theory began with the consideration of the behavior of one and two dimensional members of structures, whose states of stress can be approximated as two dimensional, and was then generalized to three dimensions to develop a more ...

Strength of materials - Wikipedia

Journal of Applied and Computational Mechanics . Welcome to the online submission and editorial system for Journal of Applied and Computational Mechanics (JACM).. The JACM is an open access, quarterly electronic journal published by Shahid Chamran University of Ahvaz in cooperation with The International Research Center for Mathematics & Mechanics of Complex Systems (M&MoCS) from the ...

Teesside University offers a solid base of engineering knowledge and skills for a wide range of industries such as aerospace, robotics, automotive, marine, renewable energy, oil and gas, and process industries.

Mechanical Engineering with Industry, MEng (Hons)

Teesside University's MEng (Hons) Aerospace Engineering degree builds on the extensive range of subjects included in the BEng (Hons) by providing advanced topics in aerospace engineering including advanced aerodynamics and complex UAV design projects. You can also choose from a range of options in advanced subjects which include rotorcraft, flight simulation, computational fluid dynamics and ...

Aerospace Engineering, MEng (Hons) | Undergraduate study

2.1. Capacitive tactile sensors. A capacitive sensor consists of two conductive plates with a dielectric material sandwiched between them. For parallel plate capacitors, capacitance can be expressed as, $C = \frac{\epsilon_0 \epsilon_r A}{d}$. Where C is the capacitance, A is the overlapping area of the two plates, ϵ_0 is the permittivity of free space, ϵ_r is the relative permittivity of the dielectric material ...

Time and time again, "multidisciplinary" research is touted as essential to innovation. That is why, from April 2-6, 2018, researchers working in seemingly unrelated fields gathered in Phoenix, Arizona, to promote, share and discuss issues and developments across disciplines.. The 2018 MRS Spring Meeting & Exhibit is the key forum to present research to an interdisciplinary and international ...
