Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...

Two-level game theory is a political model of international conflict resolution between states derived from game theory and originally introduced in 1988 by Robert Putnam.. Putnam had been involved in research around the G7 summits between 1976 and 1979. However at the fourth summit, held in Bonn in 1978, he observed a qualitative shift in how the negotiations worked.
