Basic Endoscopic Equipment - Wiley-Blackwell

The human digestive system consists of the gastrointestinal tract plus the accessory organs of digestion (the tongue, salivary glands, pancreas, liver, and gallbladder). Digestion involves the breakdown of food into smaller and smaller components, until they can be absorbed and assimilated into the body. The process of digestion has many stages. The first stage is the cephalic phase of ...

Improving the U.S. health care system requires simultaneous pursuit of three aims: improving the experience

of care, improving the health of populations, and reducing per capita costs of health care.

The Triple Aim: Care, Health, And Cost | Health Affairs

Irritable bowel syndrome (IBS) is common in the general population and has a significant medical and socioeconomic impact. IBS has long been viewed as a functional gastrointestinal (GI) disorder, which means the symptom complex of chronic abdominal pain and altered bowel habits cannot be explained by identifiable structural or biochemical abnormalities.
