## **generation v the complete pdf**

A generation is "all of the people born and living at about the same time, regarded collectively". It can also be described as, "the average period, generally considered to be about thirty years, during which children are born and grow up, become adults, and begin to have children of their own". In kinship terminology, it is a structural term designating the parent-child relationship.

The history of video games goes as far back as the early 1950s, when academic computer scientists began designing simple games and simulations as part of their research or just for fun. At M.I.T. in the 1960s, professors and students played games such as 3D tic-tac-toe and Moon Landing. These games were played on computer such as the IBM 1560, and moves were made by means of punch cards.
