Good pus wound - Answers on HealthTap

Pus is a sign of infection. It is your body's immune cells that have died fighting the bacteria and no longer serve any purpose and is actually getting in the way. If it can be removed without damaging surrounding tissue, spreading the bacteria, or is required as there is so much of it, then it should be as it greatly reduces the number of bacteria in the body.

Why is it beneficial to remove pus from a wound instead of

Should you drain pus from an infection? April 18, 2016 by woundcaresociety Leave a Comment Pus is an accumulation of dead white blood cells with fungus or bacteria in infected tissues located beneath the epidermis, e.g. the fat tissues.
