Mapping a Route Toward Differentiated Instruction // Carol

A mind map is a diagram used to visually organize information. A mind map is hierarchical and shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

Mind map - Wikipedia

In computing and data management, data mapping is the process of creating data element mappings between two distinct data models. Data mapping is used as a first step for a wide variety of data integration tasks, including: . Data transformation or data mediation between a data source and a destination; Identification of data relationships as part of data lineage analysis
