

### **marine ecosystem based management pdf**

Ecosystem-Based Management (EBM) has gained international popularity in recent years, but the lack of consensus on its definition has precluded the use of a universal implementation framework.

### **Key principles of marine ecosystem-based management**

Marine ecosystems are among the largest of Earth's aquatic ecosystems and are distinguished by waters that have a high salt content. These systems contrast with freshwater ecosystems, which have a lower salt content. Marine waters cover more than 70% of the surface of the Earth and account for more than 97% of Earth's water supply and 90% of habitable space on Earth.

Fisheries management is the activity of protecting fishery resources so sustainable exploitation is possible, drawing on fisheries science, and including the precautionary principle. Modern fisheries management is often referred to as a governmental system of appropriate management rules based on defined objectives and a mix of management means to implement the rules, which are put in place by ...

Although Phase 1 has demonstrated the effectiveness of the managed retreat approach, only approximately half of the threatened shoreline infrastructure has been relocated. Additionally, several features of the project remain outstanding or require modification as a result of lessons learned. With the recent award of grant funding, planning is now underway.
