Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts

interact with each other in multiple ways, culminating in a higher order of emergence ...

### **Complexity - Wikipedia**

Description: The Administrative Office of the U.S. Courts provides information on consumer and business bankruptcy filings. Where the source data showed bankruptcies in one county in multiple districts (for example, El Paso, Texas bankruptcies in Pennsylvania's Eastern district as well as Texas's Western district), the counts from the county in each district were added together.

Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP.. Growth is usually calculated in real terms - i.e., inflation-adjusted terms - to eliminate the distorting effect of inflation on the price of goods produced.
