A coordinate singularity occurs when an apparent singularity or discontinuity occurs in one coordinate frame, which can be removed by choosing a different frame. An example is the apparent singularity at the 90 degree latitude in spherical coordinates. An object moving due north (for example, along the line 0 degrees longitude) on the surface of a sphere will suddenly experience an ...

Highlights In this work we developed a new method for determination of the parameters of the Prony series of rubber compounds. The ABAQUS code was used in conjunction with a Nelderâ€“Mead Simplex optimization method. The combination of the hyperelastic models with a viscoelastic equation can predict real mechanical behaviour of the rubbers.
