Mechatronics, which is also called mechatronic engineering, is a multidisciplinary branch of engineering that focuses on the engineering of both electrical and mechanical systems, and also includes a combination of robotics, electronics, computer, telecommunications, systems, control, and product engineering. As technology advances over time, various subfields of engineering have succeeded in ...

Simcenter Amesim is a commercial simulation software for the modeling and analysis of multi-domain systems. It is part of systems engineering domain and falls into the mechatronic engineering field.. The software package is a suite of tools used to model, analyze and predict the performance of mechatronics systems. Models are described using nonlinear time-dependent analytical equations that ...

Bachelor of Science Mechanical Engineering. Entering freshmen desiring to study mechanical engineering will be admitted to the Freshman Engineering Program. They will, however, be permitted, if they wish, to state a mechanical engineering preference, which will be used as a consideration for available freshman departmental scholarships.

The optimum functional characteristics of suspension components, namely, linear/nonlinear spring and nonlinear damper characteristic functions are determined using simple lumped parameter models. A quarter car model is used to represent the front independent suspension, and a half car model is used to represent the rear solid axle suspension of a light commercial vehicle.

What is an electronic control unit? Progress in automotive technology is above all due to electronic control units. Their sophisticated electronics can now control highly complex driving functions in modern vehicles.

In practice, this electromechanical coupling factor is commonly evaluated using a so-called resonance and antiresonance technique. With increasing measurement frequency, the impedance of piezoelectric materials is typically revealed as shown in Fig. 2(a) due to a mechanical resonance, the frequency of which is determined by the sample geometry for a given vibration mode.

Product Spotlight. Rose+Krieger manufactures an extensive line of machine tool components for assembly, automation, and production environments. ClampWorks offers aluminum and steel tubing with die-cast aluminum clamps for quick-and-easy positioning and repositioning. FrameWorks is a high-quality, easy-to-assemble extruded aluminum construction system ideal for any application.
